

Check arguments passed
into SJNodeFactory for
coherence protocol
definition

Verify the list of participants
created by the
createParticipantList
method

Analyse the
makeGlobProtMembers
method (in particular field
disambiguation)

Ensure that the
SJGlobSessionType field is
initiated to the correct type
and check its children

Check the entire
SJGlobProtocolDecl
class at the end of the
constructor call

Perform final check of the
protocol after initialisation
in the SJProtocolTranslator
pass
